SUMMARY

An Information Technology graduate from Pamantasan ng Lungsod ng Pasig with a versatile skill set across development, design, data, and hardware. Passionate about frontend development and UI/UX, with a hobbyist's fluency in graphics design tools. Detail-oriented and adaptable, I aim to build a career grounded in technical and creative skill, fresh ideas, and a commitment to serving others with integrity.

EDUCATION

Pamantasan ng Lungsod ng Pasig 2022–2026

Bachelor of Science in Information Technology

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Integrative Programming, Database Systems, Discrete Mathematics, Security & Assurance, Software Engineering, System Integration and Architecture, Multimedia Technologies, Human Computer Interactions, Web Development, Advanced Database Systems

Awards:

- President’s List Academic Achievement Awardee
- Consistent Dean’s List Academic Achievement Awardee

Associates:

- Pasig City Scholar | 2016 – 2026

Buting Senior High School 2020-2022

Information Communication and Technology

Awards:

- High-Honor Awardee
- Consistent Honor Student

SKILLS & INTEREST

Technical Skills: Creative Design (Figma / Photoshop / Canva / Clip Studio Paint / Inkscape / Aseprite); Video Editing (Premiere Pro / DaVinci Resolve); 3D Animation (Blender, Source Filmmaker); Photography & Editing (Darktable); Programming (JavaScript / TypeScript / Python / C++ / Java / PHP); Web Development (HTML / CSS / React / Tailwind CSS); Data Analysis (Pandas / NumPy); Database Management (MySQL / Supabase); Hardware (Troubleshooting, Assembly, Configuration); Network (Troubleshooting); Version Control (Git); Containerization (Docker); Hardware Programming (ESP32); Cloud (Operation); Microsoft Office (Word / Excel / Powerpoint); Administrative Operations

PROJECTS

SlabUI Component Library | *React, TypeScript, shadcn/ui* January 2026

- A personal project. Building a neobrutalist design system with custom React components extending shadcn/ui architecture, featuring bold, high-contrast UI with thick borders, stark shadows, and vibrant color schemes while maintaining accessibility and appropriate user-experience standards. Inspired by design-forward companies like Gumroad and Figma, deliberately challenging minimalist designs to create distinctive, artistic interfaces that are reusable and composable.

Consrv | *React, Vite, Typescript, Arduino, Supabase* October 2025

- A capstone project wherein the team engineered an IoT water conservation system for Barangay Bambang using rainwater as an alternate source for general consumption instead of groundwater with real-time tank monitoring, automated pump control, and leak detection using HC-SR04 ultrasonic sensors, YF-S201 flow meters, and water level sensors integrated with ESP32 microcontroller, transmitting data via HTTP to Supabase REST API.

Barangay San Miguel CMS | *HTML, CSS, JavaScript* June 2024

- A community-focused project. Led frontend development for a Community Management System, designing responsive interfaces for service request forms, admin dashboards, and analytics displays with focus on usability and accessibility. Streamlined community services by centralizing Barangay San Miguel’s operations in one platform, providing staff with tools for maintenance and updates.

EXPERIENCES

On-the-Job Internship | *Rizal High School* February - May 2026

- Handled administrative tasks at the registrar office including file auditing, documentation creation, and verification and certification of learner data.
- Designed graphical materials such as an organizational chart, document pamphlets, and promotional material for Rizal High School's early registration.
- Performed computer maintenance and resets based on issue severity, removing bloatware and unnecessary Windows animations. Troubleshooting network connectivity issues including failures and disruptions.
- Developed a C.A.V. (*Certification, Authentication, and Verification*) system using React that improved form encoding, replacing the one-by-one process with a single form entry that automatically populates all CAV forms, ready for download or print.
- Developed an SF10 system using React that digitizes legacy and recent learner records through a form creation process, archived via the cloud. The system dynamically generates SF10/Form 137 data including learner information and grades, automatically accommodating summer and retention records. Also integrated a prototype scanner using the Tesseract OCR Engine with more room for improvements.

ACHIEVEMENTS

- 14th IT Skills Olympics** | *Participant*November 2025
- Delivered a technical demonstration of Binspire, an IoT waste management system, securing 1st runner-up among 17 participants in the Android Development - IoT category.
 - Worked within a team handling frontend development and quality assurance, covering UI/UX breakpoints across different screen sizes to ensure a consistent layout, contrast corrections for better readability and accessibility, and defining component states such as idle, clicked, hover, and disabled to maintain a coherent and functional user interface throughout the application.

CERTIFICATIONS & WORKSHOPS

- EF SET English Proficiency** | *Certificate*July 2026
- I just took an English proficiency test at EFSET and scored 61, which indicates that my proficiency is C1 Advanced. For reference, the following link redirects to the certification: <https://cert.efset.org/en/CPgyez>
- GAD:WEASH** | *Compiled*June 2025
- I took part of Pasig’s Gender and Development (GAD) seminar titled “*Work Ethics and Anti-Sexual Harassment (WEASH)*” on June 16, 2025 at the PLP Auditorium. The certificate link is: <https://tinyurl.com/283xtrua>.
- SHE++ Workshop** | *Compiled*August - October 2025
- I took part in PhilDev's workshop called SHE++, accommodating various workshops and masterclasses such as *Design Thinking, Strategic Foresight and Intro to Technopreneurship, Masterclass on Alibaba Cloud System, and Leadership and Technopreneurial Mindset*. The following compilation link of the certificates of the workshops and masterclass is: <https://tinyurl.com/SHEPLUSCERT>.
- Amazon Web Services Certificates** | *Compiled*December 2025
- I took AWS certificates and compiled them onto one single document. The following badges I’ve taken are *Introduction to Cloud 101, Getting Started with Storage, Getting Started with Compute, Getting Started with Databases, Getting Started with Cloud Operations, Getting Started with Security, and Getting Started with Serverless*. The compilation link is: <https://tinyurl.com/BadgesAWS>.
- Microsoft Azure Certificates** | *Compiled*December 2025
- I took Azure certificates and compiled them onto one single document. The following badges I’ve taken are *Describe Monitoring Tools in Azure, Describe Features and Tools for Managing and Deploying Azure Resources, Describe Features and Tools in Azure for Governance and Compliance, Describe Cost Management in Azure, Describe Azure Identity, Assess, and Security, Describe Azure Storage Services, Describe Azure Compute and Networking Services, Describe Cloud Service Types, Describe the Benefits of Cloud Services, Describe Cloud Computing, Describe the Core Architectural Components of Azure, Introduction to Cloud Infrastructure: Describe Azure Management and Governance, Introduction to Cloud Infrastructure: Describe Azure Architecture and Services, and Introduction to Cloud Infrastructure: Describe Cloud Concepts*. The following compilation link of the badges is: <https://tinyurl.com/BadgesAzure>.
